PREFACE

In compiling this 1951–1960 edition of the Decennial Index to the Monthly Catalog of United States Government Publications our purpose has been to provide a useful reference tool that will help make the information and knowledge contained in Government publications issued during this decade more accessible to the public. Citations in the index are by year and entry number.

Major emphasis has been placed on subjects in the preparation of this index. There are no entries for individual authors and only titles of unique interest and importance are included. Citations for series or publications which are closely identified with a particular department or agency are listed under the name of the Bureau or Agency. However, for regularly issued series, such as Farmers' Bulletins, which appear in practically every issue of the Monthly Catalog, citations under series title and Government author have been omitted. A *see* reference to the Monthly Catalog has been made in these cases.

In coordinating the index entries under large subjects, many subheads have been established and consistent patterns of treatment worked out. New subjects have been established which reflect the advance in scientific and technological knowledge during this period. Obsolete and archaic subjects have been discontinued or replaced by those of more modern usage.

Where title or principal subject phrases of serial publications have changed during the ten-year period, an endeavor has been made to use a single entry for the whole decade. This, in most cases, is the later style of entry.

Congressional Committee hearings and reports are indexed under the subject or subjects covered by the publications. Citations for cumulations of hearings or reports under the individual committees have been omitted.

The preparation of this index was under the direction of the late Joseph A. King until he was appointed Assistant Superintendent of Documents in 1965, at which time Mrs. Margaret B. Wilson, the newly appointed Chief of Library, took over the task and carried it through to its conclusion. Working under this leadership was a committee composed of staff members of the Public Documents Library. During the years that this project was in progress, the membership of the committee changed because of personnel changes in the staff. We would like to list all of the members of the staff who throughout the years have devoted so much time

and energy to this work, but since this was a group effort it would be quite difficult to be sure that we had included all who had contributed their part in making this index possible.

CARPER W. BUCKLEY,
Superintendent of Documents.

inflatable life boats, operation, etc., manual (1953) 13595–596; (1954) 19009; (1957) 5833
isotopic oxygen exchange between water and carbon dioxide, USSR study (1960) 10049
photosynthesis—
acceptor, cyclic regeneration (1954) 6435
fixation by microorganisms (1951) 19334
ribulose phosphates (1951) 14632
physiological effects—
assimilation reactions in biological systems (1951) 9171
changes in arterial oxygen and carbon dioxide effects upon microphonics (1952) 15609
inhalation of various carbon dioxide concentrations (1952) 11276
oxygen consumption and carbon dioxide excretion of guinea pigs under basal conditions on air (1952) 751
prolonged exposure to carbon dioxide in air on pituitary-adrenal interrelations in rats (1954) 15631
respiratory response (1960) 5786
thematic apperception test stories etc., to test human tolerance to carbon dioxide in submarine atmosphere (1954) 15627
toxicity, studies in submarine medicine (1952) 752
prolonged exposure, oxygen consumption of liver tissue and barbiturate detoxication time (1954) 7423
removal from submarine, atmospheres by—
amine resins (1958) 5031
pelletized lithium hydroxide hopper (1951) 20215
removing from gas, economic study of hot carbonate process (1960) 8760
sodium silicate process for bonding foundry sand (1958) 8882
solubility in dry toluene and scintillation counting (1953) 17098
